

WORLDTIMER GMT

Since 1848, OMEGA has timed historic events and human achievements around the world. The Worldtimer embodies that pioneering spirit with a dial that provides an accurate view of the world's time zones with just a glance. Continuing that commitment, today's Master Chronometer models are tested and certified at the highest level by the Swiss Federal Institute of Metrology (METAS). This guarantees more accuracy, reliability and supreme resistance to magnetism from electronic devices, such as phones and laptops, ensuring the Worldtimer is always adventure-ready.
