

NO METEORITE DIAL THE SAME

The OMEGA Constellation collection has long been inspired by the precise movement of the stars. That stellar theme continues with a new range of models featuring distinctive dials created from meteorite. Thanks to the natural pattern found within this rare space material, every slice is unique, guaranteeing that no two dials will ever appear the same. This 41 mm stainless steel version has been given a rhodium-grey galvanic colour treatment, further enhancing the design with maximum impact.
