

CONSTELLATION 41MM

Born in 1952, the Constellation quickly became a symbol of OMEGA's high quality manufacturing and record-breaking precision. Today's Master Chronometer certified models, tested at the highest level by the Swiss Federal Institute of Metrology (METAS), guarantee more accuracy, reliability and supreme resistance to magnetism from electronic devices, such as phones and laptops. Almost 70 years later, the Constellation remains a star performer.
